**INTRODUCTION TO BATH CANOE CLUB:**

Bath Canoe Club was established in the late 1970s and is based in the Old Organ Factory close to Cleveland Bridge. It has its own dedicated river access. Indoor facilities include showers and changing rooms and a dedicated disabled shower area. The club has a membership of nearly 250 and undertakes introductory training courses for new paddlers, Go Canoeing Taster sessions, open canoe trips, sea trips, white water trips and racing. It owns a range of canoes and kayaks and has sufficient personal equipment for 30 paddlers to be kitted out. We aim to introduce, train and retain paddlers to a variety of paddlesport disciplines in a safe enjoyable environment. Bath Canoe Club "...getting Bath area paddling".

**WHAT WE NEED TO IMPROVE:**

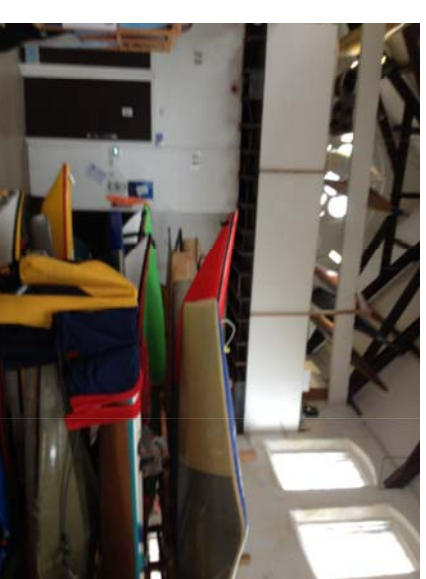

Upstairs - increase floor space to allow greater use of the building. Open space will allow flexible use. Heated interior will attract members to use the facilities.  
 Outside - Access to the water. All access is through one narrow steep corridor. Remodelling will remove the current hazard and reduce the risk of injury and damage.
